Using Preinstalled Scripts

How do I install the Agora Shopping Cart?

Login to Cpanel and look under CGI Scripts for our auto-installer and follow the directions. You can get more information at <http://agoracart.com>.

Installing Agora will use 1 MySQL database.

How do I install osCommerce?

Login to Cpanel and look under Fantastico or CGI Scripts for our auto-installer and follow the directions.

You can get more information at <http://oscommerce.com>.

Installing osCommerce uses 1 MySQL database.

osCommerce supports Paypal.

Do any of your carts support Paypal?

Yes. OsCommerce supports Paypal upon install. See <http://oscommerce.com>. Agora can support it but you must be a Pro Member of their site to download it and there is a yearly or lifetime fee to become a Pro Member. See <http://agoracart.com>

What payment gateways are supported by the Agora Cart?

2Checkout
AgoraPay
Authorize.net
eWay
iTransact
IONgate
LinkPoint Basic
Offline / Manual
PayFlow
PayPal
PayPal IPN
Plug 'n Pay
ProPay
PsiGate
Verisign PayFlow Some may require becoming a Pro Member at their site at <http://agoracart.com>

What payment gateways are supported by OsCommerce?

2Checkout
Paypal
Authorize.net
ipayment
PSiGate
SECPay
TrustTCommerce

Others may be found in their contributions section.

OSCommerce is producing errors when I try and add a new image to my catalog, what am I doing wrong?

Make the following changes in these two files:

public_html/YourStoreDirectory/admin/includes/configure.php
public_html/YourStoreDirectory/includes/configure.php

Look for this:

```
define('DIR_FS_DOCUMENT_ROOT', $DOCUMENT_ROOT);
```

and replace it with:

```
define('DIR_FS_DOCUMENT_ROOT', "/nfs/home/username/public_html" );
```

****replace the username with your cpanel username****

Our servers use a network filesystem, by using /nfs/home it will point it ot the network file system and this will fix the errors.

Do you offer any scripts for your customers?

Yes. In Cpanel under CGI Scripts we offer:

Phpbb Bulletin Board
HTML/Java Chat Room
phpMyChat
CGI Wrapper
Random HTML Generator
Simple Guestbook
Advanced Guestbook
Counter
Clock
Countdown
cgiemail
EntropySearch
EntropyBanner
PHP-Nuke
InvisionBoard
OsCommerce
Agora Cart

You will find a further 40+ scripts under the "Fantastico" menu.
